

FLIGHT HEAD APEX MINI

The Flight Head Apex Mini is a unique direct drive 3-axis stabilized remote head that is compact and lightweight, yet highly rigid for the vast majority of cameras. Apex Mini eliminates unwanted shake and vibration during fast and rough camera moves, delivering high-performance with precise control. It has sufficient power to maneuver a camera with a large zoom lens and can be mounted to any type of camera crane, cable cam, or tracking rig. Apex Mini is the perfect head for studio work and all kinds of tracking shots.

HIGHLIGHTS

- Digital 3-Axis Gyrostabilized
